INFANT RADIANT WARMER

(MODEL: IRW 1723)

INFANT RADIANT WARMER (MODEL: IRW 1723)

Advance micro processor controlled system with self check on the electronic circuitry skin / Air Manual control.

Digital display of baby temperature.

Manual / Servo control modes provide the clinician more flexibility while optimizing the thermal environment.

In addition the skin / Air temperature display is larger than the other set temperature display.

Skin temperature can be converted from Celsius to Fahrenheit by the push of a button.

The spacious baby bed incorporates easy drop down sides for maximum access to the baby.

The control panel is also the heart for a completely integrated alarm system with both audible and visual indicators in the event of

Probe fail

- · Skin High
- Skin Low

- · Power Fail
- · Heater Fail

Manual Mode

Facility of converting the warmer from servo mode to manual mode for non-stop working of the unit.

Heater Assembly

The heater assembly located above the centre of the support structure consists of an integral examination light and a 650 watts heating system (Silica or quartz / Ceramic Heater) for quick warming and even distribution of heat on the baby bed. The heater can be swivelled in either direction for taking X-ray and doing procedures.

Castors

The system is fitted with 4" high quality castors having brakes in front 2 castors. Antistatic castors (Optional)

Baby Bed

The spacious baby bed incorporates easy drop down/fold down glasses for maximum access to the patient.

Optional: X-Ray facility is provided below the baby bed for taking X-ray of the baby without disturbing.

Dimensions

Technical Specification Electrical Specification (IEC complaint)

Height 1850mm Power supply - 200V / 50Htz
Length 1050mm Heater Power - 650 Watts

Width 650mm Fuse - 5 Amp.

Highlight of the product

The unit is designed in such a way that the main control system can be swivelled to the other side for access from all the four sides to the patient in critical condition.

option: weighing scale
